

# APPLICATION INSTRUCTION FOR A TEMPORARY TATTOO

## CHOOSE AND PREPARE THE DESIRED APPLICATION PLACE.

01

To place the design, find a hairless place on the skin. We do not advise to place the tattoo with even a little bit of hair since the removal of the design can be really time consuming.

02

Before placing the temporal tattoo prepare your skin accordingly.

03

Degrease! Use warm water with soap or alcohol-containing liquid.

04

The surface that you will apply the tattoo to, needs to be completely dry. In other case, the tattoo will not hold to the skin.

## PREPARE YOUR DESIGN TO PLACE ON THE SKIN.

01

The temporal tattoos are printed on an A4 and A3 page. On one sheet there can be a couple or a dozen tattoos placed, depending on the size of the design. The design on the page is in a mirror view, of the way they will look on the skin. Each sheet has a special sticky layer, thanks to which the designs can be transferred to the skin.

02

Cut out the desired shape with scissors, as close to the edge as possible. The tattoos do not have a cut line – you need to give them the desired shape, cutting with scissors or a knife.

03

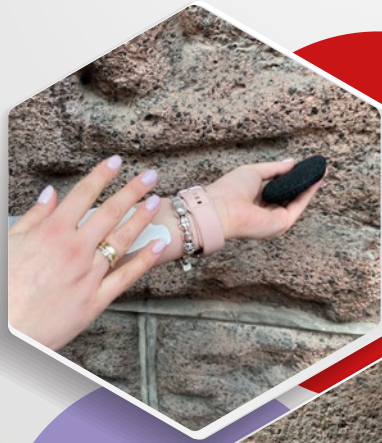

After cutting the desired shape, remove the protective film. It is **IMPORTANT!** If you forget this step, the tattoo will transfer to the transparent foil. Unfortunately, then you will not be able to recover the design.

## IT'S TIME TO PLACE YOUR TATTOO

01

Place the tattoo, with the design facing the skin and apply pressure evenly. The design needs to be touching the skin with the whole surface.

02

Moisten the tattoo with a wet cloth or directly with water. Do it exactly step by step, to get the desired effect on the skin.

03

Press the design onto the skin firmly for about 30 seconds. Pay attention, to move it even a millimetre.

04

Carefully remove the paper, in order not to damage your temporal tattoo. Wait till the tattoo is completely dry – and its ready.

05

To remove the tattoo, use a baby oil. Wipe the skin with a soaked cotton round. In case its needed use pressure to remove any residue.
